Update on Dixie-E213, 251 and 252 off fire for night, returning tomorrow 0700. E212 night shift in the canyon defending our Hydro structures. E212 on rest tomorrow. E242 on SHF Salt tomorrow, E241 available at RDD. We will hopefully complete our asset pre treatment tomorrow and monitor the fire for additional asset threat. Managed to keep the 2 pair of 230 KV Rio Oso T-lines energized, talked the IC into it. The Caribou-Palermo 230 KV phased off line due to heavy smoke. Fire should make a good down canyon push tonight.
